# LUKOIL TO SUPPLY LUBRICANTS FOR SERVICING TOYOTA MATERIAL HANDLING VEHICLES

LUKOIL has signed an agreement with the world's top loading equipment producer Toyota Material Handling (TMH). According to the agreement, LUKOIL will supply lubricants for servicing Toyota and BT loading equipment in all Russian regions.

LUKOIL will primarily supply Toyota Material Handling RUS with LUKOIL GENESIS, LUKOIL AVANTGARDE ULTRA engine oils, LUKOIL GEYSER hydraulic oils, LUKOIL TM4, TM5 and ATF transmission oils as well as innovative greases of FLEX series.

"Toyota advocates the concept of Kaizen or continuous improvement philosophy. LUKOIL shares similar views, focusing on development of high-tech products. The Company's specialists design premium lubricants in accordance to the requirements of leading Japanese OEMs. Our cooperation with Toyota Material Handling confirms that we are headed in the right direction," said LUKOIL Lubricants Company General Director Maxim Donde.

For reference:

TMH is a world leader in production of loading and storage equipment. The group has 9 manufacturing facilities in Japan, Brazil, Italy, China, USA, France and Sweden. The company produces equipment under Toyota, BT, Raymond, Cesab and Aichi brand. TMH is part of Toyota Industries Corporation, which is active in five business areas: automotive, materials handling, electronics, logistics and textile machinery.
