LUKOIL TO SUPPLY LUBRICANTS TO CATERPILLAR PLANT IN RUSSIA

LUKOIL has started supplies to the Russian plant Caterpillar Tosno, subsidiary of Caterpillar, a global manufacturer of equipment. Particularly, the Company will provide Caterpillar Tosno with a wide range of products, of which LUKOIL GEYSER hydraulic oils will constitute main volume.

LUKOIL GEYSER is a series of oils for use in in high-load hydraulic equipment, including ultrafiltration systems with a purification degree from 1 to 5 microns. LUKOIL GEYSER oils are certified under international standards of German Institute for Standardisation (DIN 51524 part II, III) and meet the requirements of Caterpillar.

For references:

Caterpillar is one of the leading global equipment manufacturers. The company has been operating in Russia since 1994. In 2000, Caterpillar opened its own local plant in Tosno (Leningrad region). As of today, the plant manufacturers Cat 320 and Cat 336 hydraulic excavators and Cat 773 and Cat 777 off-highway trucks as well as about 100 kinds of spare parts for heavy equipment.
