LUKOIL BECOMES LUBRICANTS SUPPLIER FOR ONE OF LEADING RUSSIAN EQUIPMENT MANUFACTURERS – UMG

LUKOIL has conducted first deliveries of lubricants for its new partner UMG GROUP, a large Russian construction and road-building equipment manufacturer.

LUKOIL modern engine and transmission oils, hydraulic fluids and antifreezes will be used for the first fill of all equipment manufactured at Tver-based EKSMASH plant, part of UMG. LUKOIL GEYSER LT hydraulic oil will constitute the bulk of the supplies. This is the only hydraulic oils line in Russia certified under the main international standard of German Institute for Standardization (DIN 51524 III).

For reference:

EKSMASH plant produces a wide range of wheeled and crawler excavators, industrial loader-backhoe, and other equipment weighting from 13 tons to 36 tons. This is the only Russian manufacturer producing loader-backhoe weighting 28 tons and above as well as harbor handling equipment and metallurgical, pulp-and-paper and forest machinery.
