LUKOIL OIL MEETS THE NEWEST MERCEDES-BENZ SPECIFICATION FOR TRUCKS AND BUSES

LUKOIL AVANTGARDE PROFESSIONAL XLE motor oil was the first 10W-4 oil in the world to be officially approved in accordance with the new Mercedes-Benz standard for commercial vehicles – MB-Approval 228.52.

This specification was created by the German automotive concern in 2019 for oils operating in modern diesel engines of trucks and buses equipped with diesel particulate filters (DPF). The standard is designed to maximize the protection of DPFs and extend the oil drain interval.

LUKOIL AVANTGARDE PROFESSIONAL XLE is a new generation synthet engine oil developed for Euro-6 diesel engines. This product provides solid fuel economy, enhanced wear protection and extended drain intervals. Tests on modern trucks in Europe have shown that the change interval for this oil can exceed 160 thousand km.

The of LUKOIL AVANTGARDE PROFESSIONAL XLE specifications meet th requirements of the Association of European Automobile Manufacturers - ACEA E4 / E6 / E7 / E9, American Petroleum Institute - API CK-4 / CJ-4 and Japar Automobile Standards Organization - JASO DH-2. In addition to the approval of MB-Approval 228.52, the list of official approvals for the use of automotive manufacturers for this series of oils includes MAN 3677, MAN M 3477 / 3271-1 and MB-Approval 228.51.
